▼ Quantitative Investing: News Analytics

Dan diBartolomeo, Hugh Crowther, Christopher Ahlberg, Peter Hafez, moderated by Lawrence F. Pohlman

The use of unstructured, news-based information, such as earnings call transcripts, regulatory filings, or even social media posts, in trading algorithms is a fascinating topic. It is also one that is gaining an increasing amount of attention among investment firms looking for new ways to capture alpha. In this panel, professionals from a wide variety of backgrounds will discuss recent advances in the text and sentiment analytics, as applied to systematic trading and investment strategies.
